

With some help from [xinu](#), I've seen the error of my ways and now the RSS on this blog is a lot more useful. It now includes the content of my posts, including `IMG` tags for all of that pretty \LaTeX . I also moved it from `/rss/` to `/rss.xml`, so if you've subscribed, you'll have to re-subscribe. (This is to get readers to reset, since they store old entries in the feed, and they'll all be empty now.) Enjoy!
